

Jennelle Marianne Adelle D. Salva

Valenzuela City, Philippines | +63 945 349 8892 | jennellesalva1215@gmail.com

PROFESSIONAL SUMMARY

Graduating Computer Science student and Full-Stack Developer with hands-on professional experience in mobile, web, and software engineering. Proficient in a broad technical stack including ReactJS, Python, Java, and Kotlin. Demonstrated success in building real-time applications, AI-driven traffic monitoring engines, and automated attendance systems within Agile environments, with a strong focus on backend logic, REST API integration, and seamless user experiences.

WORK EXPERIENCE

AppCase Inc. | *Software Engineer Intern*

March 2026 – May 2026

- Developed the "NeuraSense" real-time traffic monitoring system to analyze vehicle flow, improving automated traffic data extraction capabilities utilizing **Python** and the **YOLOv8** object detection model.
- Engineered a real-time Attendance Portal to modernize workforce monitoring, streamlining employee time-tracking and management using **ReactJS** and **Firebase**.
- Executed production-grade **QA testing** across mobile and web platforms to identify software defects, ensuring seamless cross-compatibility and system stability before deployment.
- Designed high-fidelity mockups and responsive UI components to guide development phases, delivering an intuitive and modern user experience using **Figma**.

ACADEMIC PROJECTS

AbangPH | *Full-Stack Developer* | 2nd Place, Best Thesis

January 2025 – December 2025

- Developed a real-time e-jEEPney tracking application to assist commuter navigation, delivering an award-winning user experience utilizing **Kotlin**, **Jetpack Compose**, and the **Google Maps API**.
- Integrated live location updates and dynamic route displays to map vehicle movements, providing users with accurate transit data through **Firebase Realtime Database**.

MetroRun | *Game Developer & Team Leader*

August 2025 – December 2025

- Engineered a high-performance 3D endless runner to create an engaging player experience, maintaining optimal, stutter-free frame rates by implementing object pooling via **Unity** and **C#**.
- Developed custom game mechanics to drive core gameplay interactivity, resulting in responsive lane-switching logic, accurate obstacle collision detection, and a fully functional dynamic scoring system.

CERTIFICATIONS

Cisco Certified **Support Technician (CCST) Cybersecurity**

March 2026

PMI Project Management Ready Certification

February 2026

Certificate of Completion for **Operating Systems Basics** through Cisco Networking Academy Program

December 2025

TECHNICAL SKILLS

- Languages & Databases:** Java, Kotlin, Python, PHP, JavaScript, C#, C++, HTML, CSS, PostgreSQL, MySQL
- Frameworks & Libraries:** ReactJS, Flutter, .NET, Jetpack Compose, YOLOv8, REST APIs
- Cloud & Architecture:** Firebase, Supabase, Vercel
- Tools & Methodologies:** Git/GitHub, Figma, Unity, Arduino, Agile/Scrum, Unit Testing

EDUCATION

Our Lady of Fatima University - Valenzuela

August 2022 – August 2026

Bachelor of Science in Computer Science

2nd Place, Best in Thesis Award | **GPA:** 1.38 / 1.00 (Equivalent to 3.62 / 4.0)
